Comfort with smartphones	■■■■■
Wish for company	■■■■□
Art knowledge	■■■□□
Privacy concern	■■□□□

Design assumptions, not survey data.

WHO HE IS

Yu-Hsuan studies media design and computing. He follows robotics and AI news, builds small projects with friends, and loves anything interactive. He visits the museum to learn something new, take photos and share them online. For him a guide robot is not a risk but the **highlight of the visit**: he will chat with it, test what it knows, and tell his friends about it afterwards.

THE CORE INSIGHT

He does not just accept the robot, he wants it. A quiet visit becomes a conversation, but a slow or scripted robot disappoints him fast.

VISIT MOTIVATION & GOALS

WHY HE COMES

- Curious to **experience the robot guide** first-hand
- Learns the stories behind artworks quickly
- Takes photos and shares the visit with friends

WHAT HE NEEDS

- A tour that adapts to his interests
- Answers to his own questions in natural speech
- A playful, human-like conversation

INTERACTION PROFILE & PAIN POINTS

HOW HE INTERACTS

- Robot comfort **very high**, smartphone comfort high
- Talks freely, asks follow-up questions, tests limits
- Happily follows the robot from room to room

WHAT BOTHERS HIM

- Slow answers and long waiting time
- Repeated, scripted sentences
- Not understanding mixed Mandarin and English
- A robot that is blocked or out of battery

BELIEFS ABOUT ROBOTS

ALIVE
"A robot makes a museum feel modern and alive."

HELPFUL
"I learn more when I can ask questions out loud."

HONEST
"If it does not know, I want it to say so."

HE LOVES THE ROBOT WHEN…

It **answers in a few seconds** and remembers what he asked before. It has a bit of **humour** and personality. It offers a suggested route, and lets him take a **photo with it**. It admits mistakes gracefully. It stays considerate of other visitors by lowering its voice near quiet areas.

DESIGN RULES FOR OUR MUSEUM GUIDE ROBOT

- **Invite, do not force:** a friendly greeting and a clear way to start
- **Personalise:** ask interests first, then adapt the tour
- **Fast and natural:** short answers, follow-up questions allowed
- **Honest about limits:** say "I am not sure" and offer alternatives
- **Shareable moments:** photo spot, fun facts, quiz
- **Considerate:** lower the voice around quiet visitors
